EDUCATION

FPT Polytechnic College
2023 – 2025
Major: Game Programming
GPA 3.5 / 4.0 · **Graduated with Excellent Honors**

SKILLS

Unity & C#: 2D/3D, Animator, UI, VFX

Gameplay: vehicle & ragdoll physics, AI state machines, game feel

Architecture: event-driven design

Design patterns: State Machine, Observer, Singleton

Optimization: Unity Profiler, WebGL build size, fixing stutter and lag

Tools: DOTween, Odin Inspector, Unity Editor tools, level generators

Integration: SDKs, ads, Unity Leaderboards

Platforms: WebGL, Android, PC

Quality: QA checklists, debugging, NUnit

Workflow: Git, Trello, Figma

AI tools: Claude, Codex for coding and debugging

LANGUAGES

English: reading technical documentation

WORK EXPERIENCE

Unity Developer · GM Soft 12/2024 – Present · nearly 2 years
Studio developing HTML5/WebGL games for the US market

- Shipped **15+ WebGL games** on azgames.io, several reaching the portal's **Trending** list.
- Programmed gameplay and UI with a focus on **game feel** and player experience, using **DOTween** for animation, feedback and effects.
- **Cut build size by ~20 MB per game**, speeding up load times on low-end devices and Chromebooks.
- Used the **Unity Profiler** to track down stutters and lag, and optimized games to run smoothly in the browser.
- Integrated portal SDKs and Unity Leaderboards.
- Worked with designers, artists and QA to polish each game; tested builds across browsers and Chromebooks with QA checklists before release.

SELECTED PROJECTS

Undead Corridor 2D zombie shooter · GM Soft

- Gameplay: hold tight corridors against zombie waves; aim, reload, kick them back and buy stronger guns.
- Zombie AI with different speed, toughness and aggression; ragdoll physics for hits and deaths.
- Weapon switching, ammo and reload system, plus an in-game shop for weapon upgrades.
- Play demo: azgames.io/undead-corridor

Arrow Puzzle Mobile puzzle · personal project

- Gameplay: tap arrows to slide them off the board; a blocked tap costs a heart.
- Level generator that guarantees solvable boards; solver rates difficulty and powers hints.
- Rules in a pure C# core with events; ads and saves behind swappable interfaces.
- Gameplay video: ArrowPuzzle_Gameplay

Pixel Unpuzzle Mobile puzzle · personal project

- Gameplay: free jigsaw pieces into color trays before the 5-slot row fills.
- DFS solver, solvable-only generator and 0–100 difficulty score to plan a 100-level curve.
- Custom level editor in the Unity Editor (paint, undo/redo, one-click solve); logic covered by NUnit tests.
- Gameplay video: PixelUnpuzzle_Gameplay

DrawBox Puzzle Mobile logic puzzle · personal project

- Gameplay: draw rectangles that match each number to reveal a pixel picture.
- Tool that turns any pixel image into a puzzle with exactly one solution, verified by a backtracking solver.
- Gameplay video: DrawBoxPuzzle_Gameplay

GAMES SHIPPED AT GM SOFT

Racing & driving	Street Escape, Turbo Flip, Blocky Xtreme
Arcade & casual	Stumble Race, Sky Dart, Hyper Tunnel, Flipping Master, Animal Craft
Action & ragdoll	Stick Hero RPG, Planet Buster, Undead Corridor
